

Digital Whiteboard Recorder

- Capture and share all of your whiteboard notes
- Collaborate in real-time over the Internet
- Turn any whiteboard into an interactive touch screen

- **Portable** — weighs approximately 1 lb. (500g) and is only 9" long
- Attaches to any whiteboard up to 4' x 8' (1.2m x 2.4m)
- **Connected mode:** USB connection to a PC.
- **Standalone mode:** no computer required — uses built-in memory and either batteries or AC power. Download to a PC at your convenience.
- Save .ink files in most popular image formats
- Copy and paste notes into any Windows® application
- Replay and review notes stroke by stroke.
- Share notes in real-time over the Internet using video conferencing equipment, NetMeeting® or online collaboration services.

mimio Xi™ is the revolutionary, ultra-portable device that enhances the way organizations collaborate without changing the way they work. Simply attach *mimio Xi* to any whiteboard, press "Power," and start writing. Everything that is written is instantly recorded. Alternately, use *mimio Xi* with a PC and a projector to turn your whiteboard into an interactive touch screen.

Knowledge Management.

mimio Xi electronically records notes from meetings and brainstorming sessions, improving knowledge management within organizations.

- Quickly turn ideas into action with easily distributable meeting notes. Just print or email them.
- Create a common understanding of action items and plans.
- Increase accountability by having a single version of meeting notes.
- Capitalize on your good ideas, instead of allowing them to be forgotten.
- Electronic meeting notes leverage your intellectual capital despite increased employee turnover.

Remote Collaboration.

mimio Xi integrates with video and data conferencing, and is a great tool for minimizing travel while maintaining close contact with your customers or with remote locations.

- Let meeting participants see your notes and diagrams with *mimio Xi*, to augment or even replace the video.
- Use *mimio Xi* with video conferencing equipment, data conferencing software, or just an ordinary phone — either way they can see everything you say *and* write, as if they were in the room with you.

Corporate Training.

mimio Xi improves the effectiveness of training by allowing the trainee to think and focus on the topic being discussed, without having to worry about taking notes.

- Review class notes later, at the student's pace.
- *mimio Xi* can lower the cost of training by enabling distance learning, letting the trainer and trainee be in separate locations.

mimio Xi works the way you do...

...on the road

Portable, battery powered and with built-in memory, *mimio Xi* is ideal for consultants, sales people and other mobile professionals. It easily fits in any laptop bag, sets up in seconds and captures up to 10 hours of meeting notes without a computer.

Later, to share notes with clients and customers, plug *mimio Xi* into your computer, download and email the notes.

Capture notes instantly and download later.

...in conference rooms

mimio Xi's built-in memory and AC power allow ideas and action items to be accurately captured and easily shared. Increase productivity by quickly getting notes off the board and into people's hands. Connect *mimio Xi* to a computer and share whiteboard notes with remote participants in real-time over the Internet.

...in offices

Connect *mimio Xi* to your computer and turn your whiteboard into a powerful digital workspace. With its wake on write feature, *mimio Xi* is always ready to capture ideas as they are conceived and developed.

...in presentations

With a projector, computer and *mimio Xi*, any whiteboard can be turned into an interactive touch screen. *mimioMouse*® keeps your audience focused on your presentation as you control your projected desktop and applications directly from the whiteboard.
